Forord

Om Muzikzak

Muzikzak er en serie af intuitive undervisningsmaterialer, der har til formål at formidle viden om instrumenter og musikteori for bedre at kunne deltage i musikfælleskaber som fx kor og sammenspil. Materialerne er primært tænkt som et supplement til praktisk musikundervisning i grundskolen og på musikskoler. Elevbøgernes tilhørende lærervejledninger kommer med forslag til, hvordan læreren sideløbende kan supplere Muzikzak-bøgerne med teoretisk gennemgang af indholdet samt quizzer, musikaktiviteter, spil og i sammenspil.

Målet med bogen "*Muzikzak Klaver - 12 tangenter*" er at understøtte indlæringen af tonenavnene på klaverets tangenter for at give bedre forudsætninger for spil på klaver. Ydermere giver bogen et godt grundlag for videre arbejde med musikteori.

Om bogens indhold og opbygning

For at gøre bogen overskuelig er alle opgaverne opbygget ens med to opgaver pr. side. Det er i alle opgaver markeret med rødt, hvad eleven skal gøre for at løse opgaven. Man behøver derfor ikke kunne læse sikkert for at kunne arbejde selvstændigt med materialet.

For at gøre bogen så intuitiv som muligt, indeholder bogen opgavetyper, som de fleste kender fra andre undervisningsammenhænge: Labyrinter, skriv efter-opgaver, tælleopgaver, farveopgaver samt opgaver, hvor man skal sætte streger, prikker eller ringe. Som ekstraopgaver er der en række Sudoku-opgaver, som for nogen imidlertid kræver kort introduktion. Alle løsninger samt forslag til relevante musikaktiviteter og sange kan findes i den tilhørende lærervejledning.

Bogen er delt i to hovedafsnit med henholdsvis de 7 hvide tangenter og de 5 sorte tangenter. For ikke at glemme de toner, som allerede er lært, indgår alle de toner, som er lært tidligere i bogen, i mange af opgaverne.

For bedre at kunne orientere sig på klaviaturet og dermed hurtigere finde tonerne starter 1. del med opgaver om to grupper af toner. Den lille gruppe med tre hvide og to sorte tangenter og den store gruppe med fire hvide og tre sorte tangenter. Først uden tonenavne og herefter med tonenavne på de hvide tangenter: c, d, og e i den lille gruppe og f, g, a og b i den store gruppe. Herefter følger alle enkelttonerne en ad gangen, startende med c, d og e fra den lille gruppe og herefter f, g, a og b fra den store gruppe. Sidst i 1. del er der mere fokus på at finde flere toner i hhv. en oktav og flere oktaver. 1. del afsluttes med Sudoku-ekstraopgaver.

2. del om de sorte tangenter er opbygget ligesom 1. del og introducerer en tone ad gangen. Først tonerne fra den lille gruppe: Cis/Des og Dis/Es og dernæst tonerne fra den store gruppe: Fis, Gis og Ais. Til hver tone læres dog fire notationsmåder. Fx læres notationen af tonen Cis også som C#, Des og Db. De hvide tangenter er med som repetition i mange af opgaverne. 2. del afsluttes ligesom 1. del med Sudoku-opgaver som ekstraopgaver.

Om tonen *b*

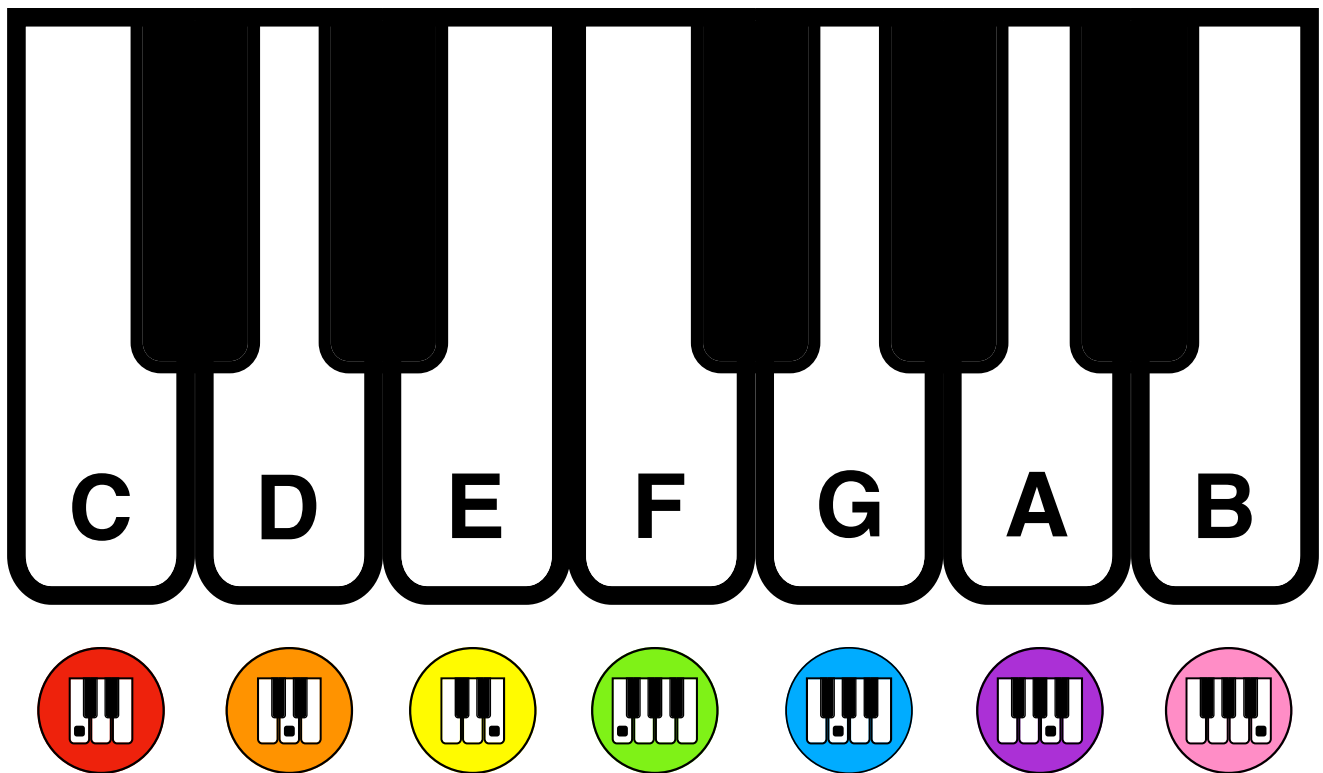

Af pædagogiske hensyn anvendes tonenavnene: *b* og *bes* i stedet for *h* og *b*. Det anbefales dog, at man i musikundervisningen snakker om, at tonerne mange steder også kaldes henholdsvis *h* og *b*.

Bøgerne kan fås på hjemmesiden: www.musikogrytmik.dk
